THE news per China from Japan is some what more definite than that to hand by the last advices, and the chief items of interest will be found in another column. GOVERNMENT NOTIFICATION

In consequence of the commencement civil war in Japan, the undersigned (by the desire of the Governor of Kanagawa) begs to call the attention of foreign merchants and ship-masters at this port to the clause of the treaties, prohibiting the sale of Fire arms, and Ammunition and Ships to any Japanese except to the Government, and also prohibiting vessels to visit any port in Japan which is not open to foreign trade A similar communication has already heen riade to the Foreign Representative at Osaka by members of the Gorogio. MARTIN DOHMEN.

No date is affixed to the Notification.

THE telegraphic intelligence published in the San Francisco side of the Pacific ocrasionally contains some rather curious items of news more remarkable for the ingenuity of their inventors than for their adherence to fact. The following is taken from the Bulletin of the 10th:-

It is reported that in consequence of the recent successes of the rebels in China, the Imperialists are reduced to extremities The Emperor of China has asked the European Powers for assistance to defend the

Has held We must beg leave to doubt the fact agreeable as such a course on the Emperor's part would be to a large number of his foreign well-wishers. Unfortunately also the latest news to hand places the rebels in extremis and the Imperialists triumphant. The old rule of believing half only of what one hear (shout China) may be advantageously recommended to the attention of our San Francisco friends.

by Congress: By the latest American files to hand we learn that the China was on her last homeward voyage, libelled by the district attorney for an alleged violation of these regulations. The libel is in the name of the people of the United States, and sets forth that, on her last voyage from this port to those of Yoko hama and Hongkong, she carried an excess of steerage passengers; that there are three tiers of berths in the steerage where the law allows but two, and the spartments for the accommodation of the steerage passengers are not properly ven tilated. The vessel was seized by the We have not heard how the case terminated, but it is one of great interest to the passenger traffic between China and California, and it is a pity that similar restrictions are not more rigidly enforced upon vessels of other nationalithe In many cases sailing vessels leave Hongkong having reported a certain number of passengers on board, while in truth they are conveying three times the number. However efficient the Harbor Master's department may be, invariable detection is almost impossible, while aubordinate officials of that department are exposed to much temptation in the way regulation is necessary in a vessel with China possesses on board which an exan absolute inconvenience by either passengers or crew-how much more necesoften short-handed and seldom provided with adequate boat accommodation in case of danger.

THE subjoined paragraph possesses an Interest for the Stamp department and Jenue, for tax-payers generally. Although no such cases have as yet occurthe cancelled stamps a second time. Ge countries in 1866. Moross the stamp, which as is well known the second plan proposed (which would add enormously to the security of those who post letters by coolies as well as who receive receipts) is the only over 300,000 lbs.

RELIGIOUS SERVICES ON SUNDAYS | one feasible. The paragraph in question is from the Bulletin:

> A despatch from Washington says that the Revenue and Postal Departments have again under examination various projects and devices for preventing frauds upon the revenue by the re-use of stamps. This evil has got to be one of very great magnitude involving a loss to Government of severa millions a year. Of the several inventions offered as preventions of this sort of swind ling, two have won the favor of Secretary McCulloch. One of these is simply at improvement on the present method of over-stamping—the improvement consisting of cutting blades attached to the stamper. by means of which the stamp affixed to a ocument is cut into eight triangles, and thus rendered worthless for re-use. This process of cancelling would make it neces sary for every man who uses a revenue stamp, and every postmaster, to have on of these stampers continually at his elbow The other invention is a truly self-cancelling stamp, requiring no attention or watching from revenue officials after it has been affixed to a letter or document. The qua lity of self-cancellation is given to it by the method in which it is printed, the stamp being so constructed that when once affixed to a document the ink with which it i printed is transferred in whole or in par the document, so that when the fabric on which it was originally printed is removed, by steaming or soaking, the ink, any portion thereof that may be desired. left on the document, while the fraudulen worker gets only a blank bit of paper, or at best but a piece with only a portion of the design remaining on it. Thus, by thu method, documents, letters and packages, by accident, while at the same time Govern ment is protected against loss by the fraudulent re-use of stamps. Another advanta geous feature in this self-cancelling method is the doing away with the necessity of over stamping and cancelling with the per necessity which every postmaster and business man look upon as a great annoyance. The self-cancelling stamp is the invention of a printer of this city.

THE following summary of the trade San Francisco will doubtless be found interesting. It is condensed from article in the Bulletin which is in turn summary of the detailed statement tained in its issue of the 9th January :-

The statistics for the year 1867 have been

prepared with a scrupulous regard to accur acy, and may be relied upon as correct in all essential particulars, both as to detail and aggregate results. The real progress nade in the material interests of the city and State during the past year has no parallel in the history of the commonwealth Our various financial institutions, business nterprises, manufacturing and other in dustries, as well as the agricultural mining interests of the State, have been rospered in an eminent degree, while the oreign commerce of our port has assumed limensions never before attained. Th value of our foreign imports for 186 was \$15,000,000, upon which the duties paid amounted to \$7,622,000, exports of merchandise (including good shipped to domestic Atlautic ports) reach ed \$22,421,000, an increase of 30 per cent, as against the previous year and 57 per cent, as against 1805. Of treasure, nearly \$41,000,000 was shipped. Included in merchandise exports was \$16.800,000 for some 50 articles of home similar articles in 1866. A few deading tems of these exports for the past year were

as follows: Wheat, \$9,453,000; Flour \$3,200,000; Wool, \$1,215,000; Skins and Furs. \$235,000 THE United States authorities are sharp | Leather, \$123,000; Quicksilver, \$931,000 in enforcing the passenger laws laid down | Ores. \$501,000; Borax, \$140,000; Wine, \$137,000, and Lumber, \$118,000. Flour and Wheat shipments alone formed 75 per cent. of our domestic exports and 55 per cent. of all our merchandise shipments. The tonnage arrivals from all sources for the past year reached 900,000 tons. On passenger arrivals by way of the sea num bered 35,600, while the departures were only 20,400 showing a positive gain o over 15,000 to our population during the year. Our receipts of treasure for the year brough the usual public channels aggregat ed \$53,412,000, of which \$2,177,000 was from foreign ports. Of the domestic receipts, at least \$18,000,000 was silver bullion from Nevada. Adding the amounts coast vian received by outside parties, as well as the usual 10 per cent, on interior receipts and 20 per cent, on coastwise receipts, cover aums in hands of passengers, gives us total for the year from all sources of \$60.682.000. The total value of our met chandise and treasure apports since 1848 - a period of 20 years - exceeds \$1,000,000,000 a sum nearly equal to one-balf of the current National debt Of this amount, \$801,610,000 was for gold and silver and \$142,525,000 for merchandise. Nearly 60 per cent, of the merchandise exports occurred during the past live years. The amount of Interna Revenue collected in the San Francisco District during the year was \$4,480,000 currency, equal to \$3,292,400 gold. coinage at the Mint for 1867 was \$20,000,000. of bribery. MURDER OF A COOLIE. Five Chinese (four coolies and a shop-master) were charged with the murder of Chinaman named Ho Achew, on the 8th inst on the Prava West, insomuch as they did by means of blows with sticks or with their fists, cause his death. The case first came ander the notice of the Coroner and a jury, when a verdict of murder was returned against the five prisoners... Mr Whyte, instructed by Mr Caldwell, appeared on behalf of the Shop-keeper and the 4th prisoner; the other three were undefended.

Inspector Ryan, deposed that, on Sunday, the 8th instant, about 12,30 p.m., the three first prisoners were brought to the Central Station on a charge of assault upon two men; who were brought up some time afterwards in chairs insensible. Constable wounded men and the 4th prisoner. The was arrested on a coroner's order on 10th. > Mr C-, who is a handsome young gentleman about 28 years of age, was taken with a humbug mania on hearing Barnum lecture last year, and in a lucky moment conceived the gorilla scheme, with which he acquainted the "prince of humbugs," who immediatedly approved on seeing him get into a well-preserved bear skin and imitate the actions of that animal. Plans were arny with Professor Davidson, and after landing, they, with considerable trouble and expense procured the skin of a gorilla of the right size. This was nicely tanned with the hair on, and arranged to suit, and when arrayed in this novel attire C- was a perfeet gorilla. With his imitations of the actions and the voice of the animal, together with the fear he inspired, which prevented strangers approaching too near him, he defied detection. Although possessing more than ordinary strongth, Mr C- has nothing like that imputed to the gorilla, and the accounts we read of it are merely gotten up for sensation. Mr S. learned much else of interest, but space forbids my writing more. Before leaving, Mr S. was introduced to Barnum, who added his entreaties to those of Davidson and C-to keep the secret, at least until he arrived home.

DETERMINED TO CROSS THE RIVER, -This morning a man who appeared to be almost ghost in spite of himself, applied to the Coroner to fill a certificate of his own death. He had procured a blank certificate of the kind he desired to file in the office and had filled it out as follows :- "This is to certify that John O'Daly is ready at any moment to die. He said he had been roaming about the city. could not work, and had not tasted food since Thursday. He insisted that he should go on Market street, lie down on the sidewalk and die, and desired to leave the certificate for the information of the Coroner. A member of the city press gave him money to purchase a meal, which would probably destroy his resolution to die.-

Mr A. M. Sullivan, editor of the Nation, was summoned by the police as a witness n the prosecution now going on against the otables of the Dublin Fenian procession Before the court, "he denounced it as a personal indignity to the editor of a national journal to aummon him as a Crown witness, and declared that he would refuse to be sworn. He avowed that he openly and deliberately took part in the procession." and then, after most grossly committing contempt of court, proceeded like an Irishman to Charge the Government with a cowardly attempt to get him imprisoned for contempt." This is the conduct of a man who pretends to find brains for his countrymen, and to deal with the weapons of armiment and reason. His sensible and dignified example was followed by a gentleman who is said to be a newspaper proprietor or Calves' Head; and Feet, sat editor also, and who unquestionably is a Shoeps' Head and Feet, member of Parliament. Sir John Gray, ropresentative of Kilkenny city in House of Commons, presented himself before the court without summons, and deslared his anxiety beforehand to "state most distinctly that he would never consent to be examined as a Crown witness." He was! going to England to spend the Christmas! olidays, and "with the most profound respect for the bench and court," wished to say before he went that he " would not be a witness ;" a declaration which was greeted with loud applause by the bystanders. Sir John Gray is not actually infatuate, he must have felt some misgivings as to his conduct as soon as this applause died out of hearing. It must have occurred to his mind that a member of the Legislature who voluntarily enters a court of instice, and there wantonly defies, and contemns the magistracy, marks himself at once as a man who might be daugerous if he wasn't foolish, and who is condemned to lasting disgrace whether or no. Copy, Circular No. 15.

PERING, October 27, 1867. Sir, -I have to call attention to a notification issued by Mr Consul Medhurst copy of which is herewith enclosed for your information. It conveys a useful warning to British subjects as to the necessity of great caution in the acceptance from the Chinese of written guarantees commonly called "Security Chops" The difference between the Chinese law and customs and our own on this head renders them in great degree, as experience has shewn; valueless; and for any security they practically afford useless without there is other and collateral security. It would be well therefore to ensure publicity to the enclosed within your jurisdiction, as a fair exposition of the actual conditions which limit the value of such guarantees in any appeal

to the Chinese authorities for execution. Your obedient servant, (Signed) RUTHERFORD ALCOCK. D. B. Robertson, Esq., C.B.,

H. B.M.'s Consul, Canton. The Undersigned desires to call the attention of British subjects in this port to the necessity of exercising great caution in the acceptance from the Chinese of written guarantees, com-De dular Affectiona, Scorbutic Spots, Spots, Sont, monly called "Security Chops." The experience Rheumatic buing, Acidity of the Stomarh and all of the past two years, during which numerous Skin Diseases are removed or ameliarated by taking suits have been instituted in this Consular Court, with almost unvarying ill success, against Chinese sureties who have failed to fulfil their written guarantees, sufficiently proves that such documents, in this part of China at any rat are comparatively worthless for the purpose for which they are given and taken-namely, the additional protection of the obligee from risk or loss. This is to be accounted for, not from any informality in the documents themselves, but from the fact that the Chinese are in the habit of regarding a surety rather in the light of person who comes forward to recommend his principal, or to assist him towards the attainment of some cherished object, such as a loan, place, &c., than as an individual who binds himself to stand to all intents and purposes obligations with and for him, to prevalent is this qualified idea of the position and duties of guarantee, that it is a common practice here for of his name, with the understanding that no individual responsibility follows upon the pro cess. The Chinese authorities moreover have been found to support this view, for they have always persistently avoided acting upon the principle that a surety is to be regarded equally responsible with his principal for all the obligations entered into by the latter, which th former undertakes shall be fulfilled; and they plead in excuse that Chinese Judicial practice whilst admitting the liability of a surety for the note and defaults of his principal, is nevertheless always careful to treat a surety when involved through the misconduct of his principal with peculiar lenity, and will not allow of his being prosecuted or pressed until the ability of the principal to make good all defalcations for himself is despaired of, no matter how stringent or how positive the terms in which the guarantee

Under these circumstances, it is clear that it is not desirable to regard Chinese "Security Chops " in the light of solemn guarantees, to by construed, as with ourselves, to the every letter but that they should always be accepted with that reservation, both as regards construction and intention, which seems inseparable from such instruments according to Chinese habit of thought and . udicial practics. The Undersigned would therefore recommend his countrymen, when taking such documents, either to see that they are protected by some collateral security are accustomed to accord to similar instrument in the West.

Opinions of the Press. Shanghar Recorder May 7, and Supreme

Court and Consular Gazette, May 11, 1867. A very useful book has just been issued from the Press in Hongkong under the title of the " Guide Book and Vade-mecun to the Treaty Ports of China and Japan, compiled and edited by Mr N. B. Dennys. The Book is very conveniently got up; is interspersed with maps of the various treaty ports, and contains, besides much useful local information, historical sketches of containing some reliable facts in conturally interested in what is said coucernng Shanghai; and a good idea of the his- liarly adapted for bringing to light valutory of this place is conveyed in Mr able information in respect to this coun-Dennys' work. * * * The other ports try, and its people, language, and inin China and also those in Japan are carefully described, and almost all particulars which can be required by the traveller or resident are to be found this work, which may be justly regarded as the "Murray" for China.

(Singapore Free Press, May 9.) We referred briefly, several days ago, to a new work published by Messrs. A. Shortrede & Co., of Hongkong, entitled "The themselves. Treaty Ports of China and Japan," But it would be utterly impossible, in a condensed notice of such a work, to give an adequate idea of its contents. The historica events of interest since the foundation the settlement of Hongkong, are perhap too much condensed into a general samma ry; but the most important feature in the composition of the society of the presen colony, is detailed at greater length When we come to consider that the book before us makes no pretensions to be a his tory, but merely a guide book, we cannot hesitate to pronounce it at once the most complete work of its kind ever issued. The Appendix may be termed the China Bradshaw, and the text teems with interesting papers, -historical, botanical, and descriptive. The maps and plans are useful illus trations of the geographical position of treaty ports, and a valuable assistance both to travellers and residents. (N. C. Daily News, May 16.

A very interesting book has lately been published, entitled "The Treaty Portsuj China and Japan," to which it forms complete guide, and regarding the history of which it gives interesting particulars. Maps of the various localities described are inserted, and an appendix shews the exist ing means of transport between Europe and America and these two countries. work of the kind was much needed, place within reach of the general pullie information regarding the district in which they reside that had hitherte been concealed under the mysterious hieroglyphics of the Chinese language, or at best oven only to sinologues. The modest hope expressed by the authors, that much wil be found in the present book that is new and unknown to the general reader, is, we think, fully justified. * * * Hongkon, and Canton, for example, each occupy mor than 100 pages, comprising every concerv able particular regarding them, from their history native and foreign, to particulars of the geological formation and botanica wealth of the neighbourhood. * * * No the least interesting feature in the book under review, is the insight it affords in into the character of the population in dif ferent parts of this vast empire. * * * One of the most interesting chapters is devote to a sketch of the history and topographic sentures of Formosa. The vicinaitudes ts history, the peculiarities of its inhabit ants, and the reputed mineral wealth of its hills afford ample subject for research; and; to a person of Mr Swinhoe's tastes, must have offered powerful attractions. From his review. * * Interesting description believe, said enough to show the scope and character of the work ; and must take leave of it for the present, though with the intention of completing our sketch of the information it gives regarding the various treaty ports, on a future occasion. In the meantime, we can assure our readers that no oue who takes the trouble to gain a the tim cemployed.

From the Hankow Times, May 18. We feel it to be a public duty to take the first opportunity of calling attention to the "Guide Book and Vade Meoun" just it sucd for "travellers, merchants, and residents in general," in the Treaty Ports of China and Japan, by Messrs Shortrede & Co., of Hongkong, * * * The order of description of the various places follows Abbé Hue on China, and Sir Rutherford their position on, or from the coast, as we Alcock's account of Japan are, no go northward. In each instance the histo- doubt, works of a far higher class ry, position, means of access, accommoda- and more extensive scope than the one on which to fall back in case of need, or to avoid tion, foreign residences, public buildings, now before us; but for practical utility, community, mode and cost of living, cli- for all purposes of locomotion, trading and mate, associations, amusements, places of in- residence in any of the places coming withterest, native institutions, population, local government, natural history, productions, and statistics of trade are given, along with a miscellaneous detail of facts and incident. Requirements and statistics of trade are given, along with know under what class of books to place it, in connection with particular localities. So for it contains a mixture of history, topofar as we are able to practically test the in-dividual descriptions of the various places, Bradshaw's Guide,—all as complete and they are given with a considerable degree excellent in their own line as could be exof fairness and fulness. Peking, Yedo, and pected; and though, perhaps, the book will not prove attractive to students, it is cal-anreay. * * The yalue of the book is culated to give a more intimate knowledge greatly increased by a most copious index, of the towns it describes, aided by the exand the work closes with a set of useful ap- cellent maps which accompany it-the pendices. The last of these is the greatest | work entirely of Chinese—than any of the novelty of the work. It consists of a bibli- more elaborated works that have preceded ographical index of all formal works pub. * * * We trust we have said enough MASHERMAN'S BOOKS, for the use lished from the earliest date in the English a show that for any one about to visit, of language on China and Japan. Opinions of the Press.

(Hankow Times, Mar. 1867.)

We insert this week, apropos of some piuant correspondence which has appeared of the late in our columns, an extract from the new publication, "Notes and Queries on China and Japan," on the subject of infanticide, which we particularly recommend to the notice of our contributors as nection with the vexed question, ; * * * Such a work as the "Notes" is pecustitutions; and we trust it will be as warmly supported as it deserves by the numerous rising and energetic men, who are now. thanks principally to the philological labours of Mr Secretary Wade, making rapid advance in the acquirement of the languages to say nothing of the devoted missionaries who have already grown grey in their service to the cause to which they have given

March 1867. Two periodicals which are likely to be of great service have also been commenced one is published at Foothow and is called "The Missionary Recorder," and the other emanates from Hongkong and is called "Notes & Queries." It is intended to serve as a medium of intercommunication for persons interested in Chinese Philology, Geography or History. These indications of literary activity are perhaps the most import. int "sign of the times" : has been our province to record, for they are all means o facilitate that mutual understanding one of the other, which seems so hard to estab-

The magnzine is every way creditable to its editor and publishers, and we cannot but wish them the atmost success in their efforts to fill an important and aitherto unoccupied place in Eastern liter-

(Shanghui Recorder, May 17, 1867.) We are put in possession of the fourth number of "Notes and Queries on China and Japan." In saying that the present number equals in interest and importance its predecessors, we have already said a. great deal in its favour. Our knowledge of these countries has hitherto been so scattered, so ill-arranged, entombed as it were, in a series of works, in different lanuages, and spreading in point of time, over the last two centuries, that some means of separating what is really new, from what aas possibly been over and over again desoribed is much to be desired * * * As a medium of intercommunication on these and many other subjects of interest to those connected with the far East, we must hail the appearance of. "Notes and Queries." * * * Wo need only add that the periodical is of convenient size, is carefully edited by Mr N. B. Dennys, and is published at the low price of \$4 per annum; and having said this, we trust that " Notes and Queries on China and Japan" will meet with that success which so creditable a production deserves at the hands of those in-

terested in Asiatic researches. (Fouchow Advertiser, May 4, 1867.) We have received a copy of "Notes and Queries:" this publication will be really useful, it contains much matter relating to China which otherwise would be lost; and Notes on Formosa" are derived many we wish it every success. We have, we and bring into notice what otherwise might havelain unknown and buried in themselves. Now that Law and Officialism have got their Guzette, Science and Philology their Notes and Queries, and Missionaries their Recorder, the various divisions of mental thought and work in this land ought to be well taken care of; for our part we are glad to see these several issues, both on account more intimate knowledge of it, will regret of the information and instruction they tfford, and the index they supply to the mental vigour of the foreign community in
